### Property Description

Here you go!!! This is the one you've been looking for! This fabulous 4-bedroom 3-bathroom home offers so much! Let's start with over 2,500sf of living space. Within that, you have a kitchen any cook would love! Tons of cabinets, counter space, a floor to ceiling pantry, a large prep island, and a breakfast area! This open floor plan connects the living room to the family room (with a cozy fireplace) which is open to the kitchen. Are you that person that wants an open floor plan, but you don't want the kitchen to be the first thing your guest see? Well than this is perfect for you! There is a downstairs bedroom with a ¾ bath right there! Upstairs there are 3 more bedrooms, but let's face it, it's the master bedroom that's the star of this show! The master is extra-large with its own retreat. The retreat makes a great sitting room, nursery, or office. The walk-in closet is the size of a small bedroom! Now let's talk about the master bathroom. A huge double vanity, water closet, separate soaker's tub and glass shower will give you a spa treatment every day! Ok so I'm assuming you don't love laundry, but let's make the best out of it with this large upstairs laundry room. Put a tv in it and go to town! The back yard features a covered patio for relaxing sunsets or entertaining large parties. There is so much to see with this one, don't miss it!
